

# Housing Density Hennepin Ave. & 32nd St. • 11 <sup>units</sup>/<sub>acre</sub>

The rowhouses on the southwest corner of Hennepin Avenue and 32nd Street were built as a live/work development. Offices on the lower level of the rowhouses were designed for self-employed professionals, such as graphic designers and accountants. Each of the three units has a raised resident entrance to the house, and a separate, street-level client entrance to the office. A fence runs along the small front yards of the rowhouses. It clearly defines the sidewalk edge, but does not block views of the offices. There is no evidence that any of the offices currently has an active commercial function.

Mixed-use buildings are common in this area of Uptown, in south Minneapolis. This house on the alley behind the rowhouses recently had a dry cleaning business located in a converted commercial space on the first floor, with customer entrance on the side of the building.

Tuck-under garages and a paved driveway at the rear of the rowhouses provide ample parking for residents, clients, and guests.

The neighborhood surrounding the rowhouses supports a diverse mix of businesses and residences, including single-family, detached homes, duplexes, and apartments.
